

5 THINGS CFOs & CONTROLLERS LOVE ABOUT AP AUTOMATION

1 WORKING CAPITAL OPTIMIZATION

Automated accounts payable solutions put real-time decision-making into a CFO's or controller's hands like nothing else. Graphical dashboards provide instant visibility into invoices.

2 CONTROL OVER CORPORATE SPEND

The graphical dashboards and rich reporting built into automated accounts payable solutions provide the real-time insights into corporate spending that CFOs and controllers require.

3 EARLY PAYMENT DISCOUNTS

An automated accounts payable solution enables buyers to approve invoices within early payment discount windows, heading-off potential supply chain disruptions, and reducing an organization's total cost of goods and services purchased.

4 CASH-BACK REBATES

Paying suppliers with virtual cards enables businesses to earn cash-back rebates. Cash-back rebates can be used to offset the operational costs of an accounts payable department or to fund automation projects.

5 LONGER DPO

Paying suppliers with certain virtual card programs enables buyers to instantly extend their Days Payable Outstanding (DPO), without changing their payment terms, freeing up cash to support various company growth initiatives.
